

Did your horse or pony find the trial mix palatable?

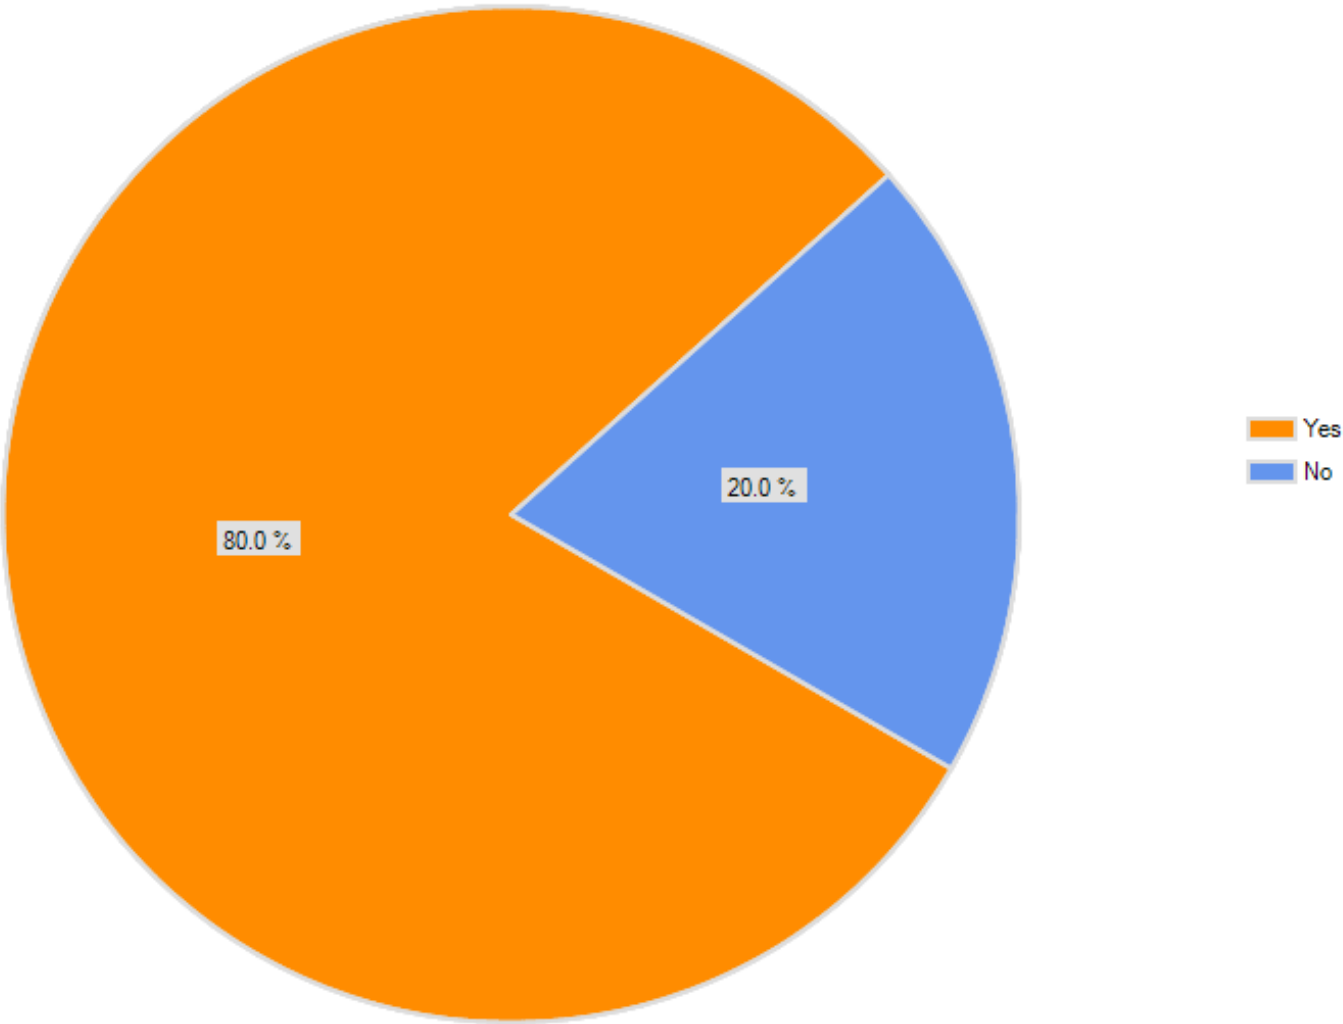

During the trial period did you find your horse or pony:

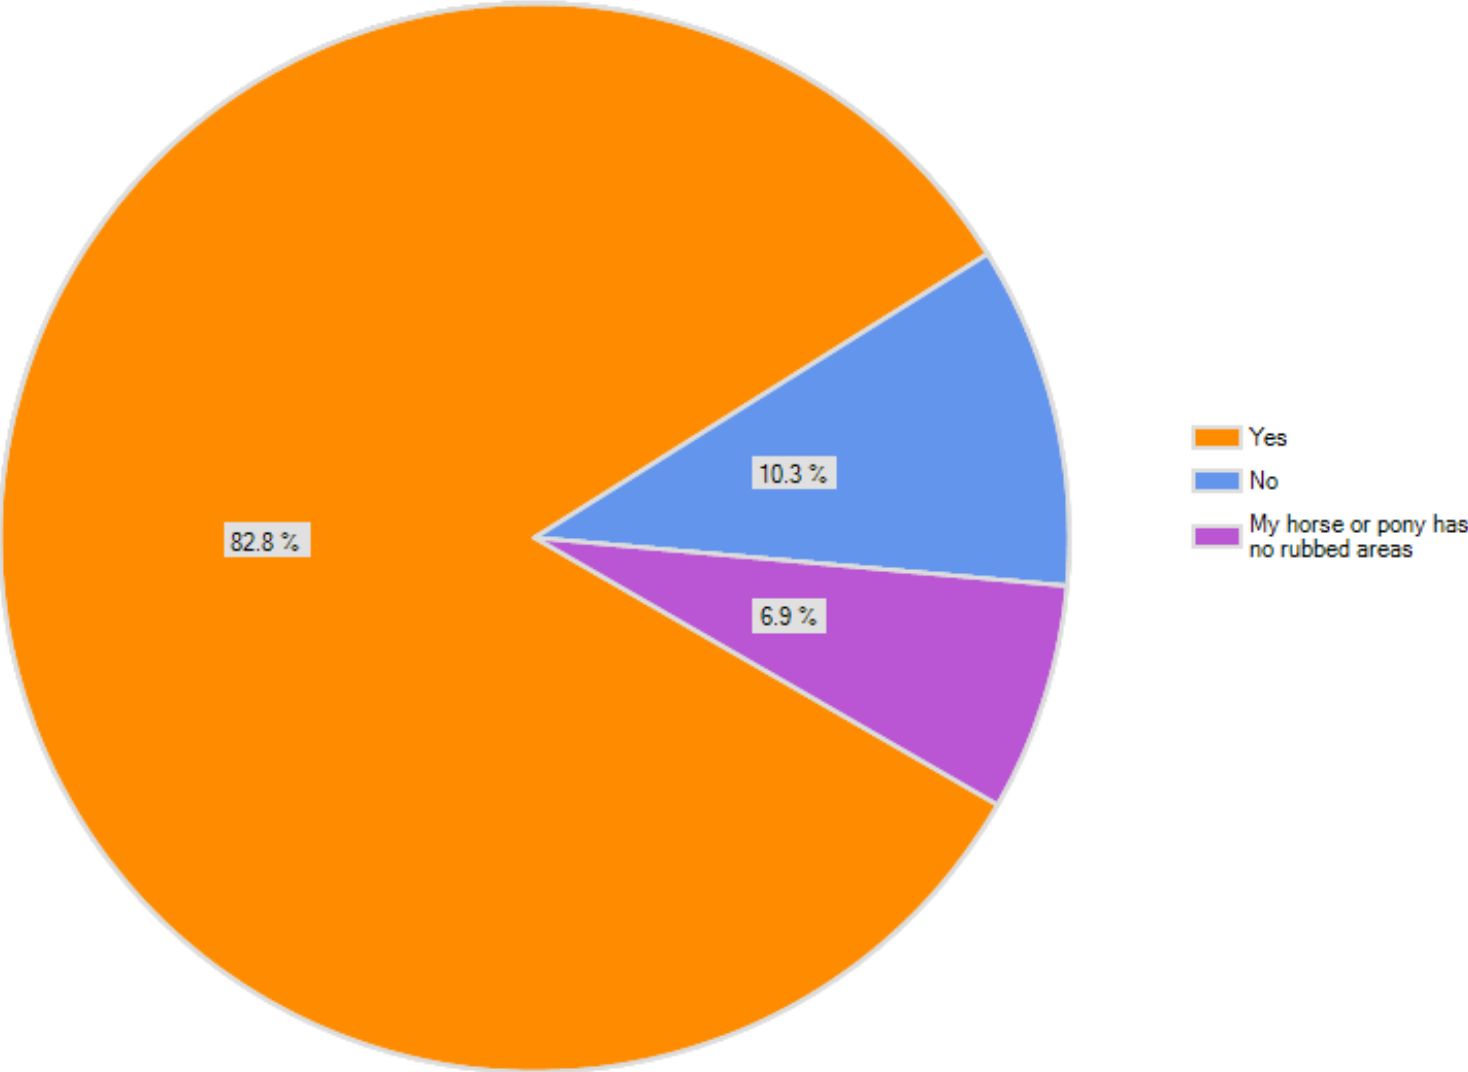

Have you seen any improvement in your horse's general coat condition?

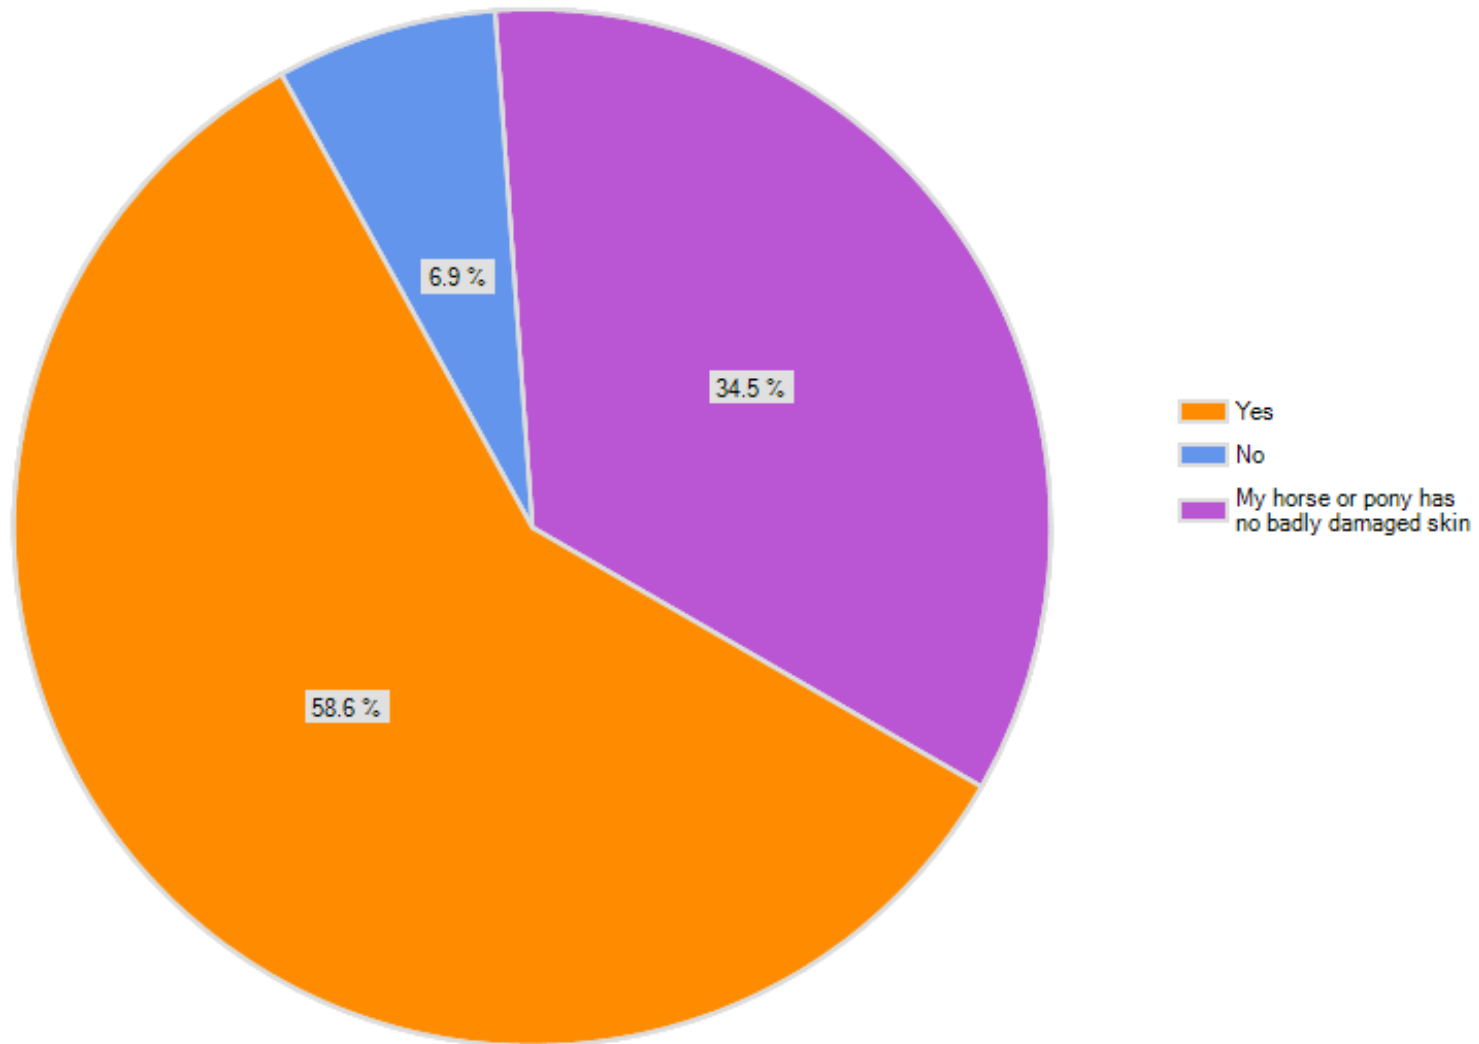

Have you seen any improvement in the condition of your horse's mane and/or tail?

Have you seen any regrowth of hair in previously rubbed areas?

Have you seen any improvement in the condition of your horse's skin in areas of badly abraded / rubbed / 'elephant' skin?

Do you think using the trial product helped your horse or pony?
